Burnett's Giant Darwin Tulips

These wonderful tulips bloom in May after the early tulips, hyacinths and narcissi are over, and continue from two to three weeks until the peony commences to unfold its petals.

To thoroughly enjoy their great wealth of beauty, and their stateliness, as they carry their giant flowers erect on tall stems, they should be planted in masses of at least 50 of a kind in open beds, or in wide borders close to a hedge, fence, shrubbery or residence, in fact anywhere that affords a background to show off their wonderful shades. They are also extremely effective planted among the perennials in the herbaceous border in colonies of 12 or more bulbs of a kind, where they can be left undisturbed for two or three years. Plant 4 to 5 inches deep and 6 inches apart.

Burnett's Grass Seed Mixtures

These mixtures are made from our own formulas and composed of grasses specially adapted for the purposes of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up these high grade mixtures we are careful to use only the very finest quality of all the most desirable dwarf evergreen, re-cleaned grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn. To obtain best results Lawn Grass Seed should be sown as soon as the ground can be prepared in early Spring or in the Fall.
